SUMMARY

Versatile frontend engineer with 5+ years of development experience in website and web application development, specializing in Vue.js and its ecosystem. Proficient in developing service-oriented websites targeting end users, with a strong emphasis on user experience, website performance, and SEO ranking.

I am highly disciplined, responsible, and adaptable, capable of both collaborative teamwork and independent work. I enjoy working together in a team with a shared goal, but I am also very capable to work independently.

TECHNICAL SKILLS

Vue.js 2/3, Nuxt.js 2/3, Pinia, Vuex TypeScript, Unit Test, VuePress, Storybook, Chart.js, D3.js, Tailwindcss, Chakra UI, Element UI, HTML 5, CSS 3, SCSS, JavaScript ES >= 11, Node.js, Express.js, Mongo DB, Github Actions, Docker, Rollup, Pnpm, Google Analytics, Google Ad Manager, Google Search Console, UI/UX, Sketch, Figma

WORK EXPERIENCE

Frontend Developer

Aotter Inc. | Taiwan (Hybrid)   November 2020 - April 2023

- Designed, implemented, and maintained a UI framework for the brand identity, which is based on Chakra UI and published on Github packages, significantly reducing the time needed for developing platforms.
- Optimized websites based on Google Core Web Vitals, including addressing issues related to LCP and CLS, generating effective webpage indexing, and improving website exposure by 20%.
- Collaborated with the marketing team to optimize the user experience of URL shortener service, which makes 3x benefit profits year-over-year.
- Integrated Google Adsense and Trek Ad into Google Ad Manager, and maintained customized code in Creative Template. Not only improve ad fill rate to nearly 100% but reduce maintenance time costs.
- Mentored junior team members and helped them to adapt and catch up with the development schedule in 2 months by designing assignments relevant to company tech stacks and domain knowledge.
- Maintained multiple products and developed new features, responsible for conducting code reviews to ensure code quality and feature completeness.
- Technologies used: Vue.js, Nuxt.js, Node.js, TypeScript, Pinia, Vuex, Tailwindcss, Chakra UI, Storybook, Unit Test, Rollup, VuePress, Github Actions, Docker, Google Search Console, Google Ad Manager

Frontend Developer

iStaging Ltd. | Taiwan (On-site)   July 2020 - October 2020

- Independently developed a video calling system with synchronized panoramic views within three months, significantly expanding the business scope and potential market.
- Participated in technology solution decision-making and developed an online webinar system.
- Technologies used: Vue.js, Vuex, SCSS, Krpano, Agora, Functional Programming

Frontend Developer

RE Ltd. | Taiwan (On-site)   June 2018 - December 2019

- Participated in product ideation and planning, collaborating with other frontend developers and visual designers to discuss UI/UX design and achieve both better user experience and program architecture.
- Utilized D3.js to process data visualization, including line charts, pie charts, bar charts, and heat maps.
- Developed and maintained commonly used components such as a numeric keypad, date range selector, etc.
- Solved cross-platform/device/browser issues.
- Technologies used: Vue.js, Nuxt.js, Vuex, D3.js
